Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit:

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 23, 29-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Paley (US Patent No. 5,506,605).

As to claim 23, Paley discloses an apparatus comprising: a manipulandum (10) movable in at least one degree of freedom; a sensor (28) operative to detect the motion of the manipulandum and to output a sensor signal that correlates with a detected motion of the manipulandum; an actuator (50) operative to provide tactile feedback that correlates with the sensor signal; and a wireless communication interface (col. 3, lines 28-29) to communicate with a host processor.

As to claim 29, Paley discloses a microphone (38).

As to claims 30-33, Paley discloses that the mouse is for interfacing with central processing unit.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 28, 34 and 58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paley (US Patent No. 5,506,605) in view of Dunaway (US Patent No. 5,450,079).

Art Unit:

It is noted that Paley does not disclose the handheld device comprising a local display with a touch panel and a local processor, separate from the host and operative to communicate with the host processor. Dunaway is cited to teach a handheld remote device which comprises a local display with touch panel and a local processor, separate from the host and operative to communicate with the host processor. It would have been obvious to one of ordinary skill in the art to have modified Paley with the features of the local display and local processor as taught by Dunaway, so that the operator can manipulate more function through the remote device.

5. Claims 24-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paley (US Patent No. 5,506,605) in view of Culver (US Patent No. 4,712,101).

It is noted that Paley do not disclose a roller is moveable in two degree of freedom. Culver is cited to teach an input device including a roller which is moveable in two degree of freedom. It would have been obvious to one of ordinary skill in the art to have modified Paley with the features of the roller as taught by Culver, so as to provide a two dimensional cursor control.

6. Applicant's arguments with respect to claims 23-34 and 58 have been considered but are moot in view of the new ground(s) of rejection.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit:

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
